To: Harlal Choudhury, Ph.D.
Director, Superfund Technical Support Center

As we discussed please could you please have Syracuse Research Corporation (SRC) undertake a second review of the document "Sources of PCB to the Kalamazoo River-PCB composition information", March 2003. We would like to have the review completed in 45 days, with a draft for review in 30 days.

The key questions we wish to have answered is as follows:

1. What are the strengths or weaknesses in the technical arguments provided in the document?
2. Does the information provided in the March 2003 change any of the opinions or conclusions reached by SRC in their February 3, 2003 analysis?
3. If the information provided does change the opinions or conclusions, please elaborate on these changes.
